OBJECTIVE

To secure a challenging software development role where I can utilize my expertise in React.js, Python, and database systems to architect scalable, secure, and performance-driven applications that support business growth and digital transformation initiatives.

INTERNSHIP

"Askan Technology Pvt.Limited" On Web Development.
"Syscrop Technology Pvt Limited" On Search Engine Optimization.

PROJECTS

Centralized Inventory Analytics System

solves pricing, demand, and stock challenges with intelligent forecasting. It offers real-time analytics, market insights, and secure access control. It helps retailers boost profits and make smarter decisions.

- **Tech Stack:** React.js, python, SQLite

Disaster Relief Management System (DRMS)

Developed a web-based where users submit GPS-enabled SOS alerts, volunteers view interactive Leaflet maps to acknowledge tasks and request resources, and admins assign and manage operations through real-time dashboards.

- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Python, SQLite, Leaflet Maps, AI (Random Forest)

Centralized Employee Document Management System

It manages employee documents across multiple stores. It tracks validity and expiry with real-time compliance monitoring. Prevents missing documents and compliance risks through alerts and reports.

- **Tech Stack:** React.js, python, SQLite
